PROFILE

Designer who works across the full product stack, from early research and hand-drawn user flows through high-fidelity Figma prototypes to implementation-ready specs. Defined the visual language and design philosophy for an enterprise ERP platform that was adopted across all versions of the product. Led UI/UX end-to-end on a home services booking app, starting from a blank page and paper sketches all the way through a full post-submission redesign. Produced a complete motion graphics campaign in After Effects and handled all brand and marketing output at Obsidian Labs. The portfolio at huthaifa2.github.io covers both UI/UX and motion work.

SKILLS

UI/UX:	Figma (Auto Layout, Components, Prototyping, Smart Animate, Variables), Wireframing, User Flows, Design Systems, Responsive Design, Micro-interactions, Motion Prototyping
Graphic & Motion:	Adobe After Effects, Photoshop, Illustrator, Premiere Pro, Motion Graphics, Brand Identity, Marketing Collateral, Video Editing
Development:	Flutter, Dart, BLoC/Cubit, Clean Architecture, Dio, REST API, GetIt
Platforms:	Git, GitHub, Codeberg, OneDev, Android Studio, Xcode, VS Code

EXPERIENCE

Graphic & Motion Designer

Apr 2026 – May 2026

Obsidian Labs · After Effects · Photoshop · Illustrator · Premiere Pro

- Produced a full motion graphics campaign for Polaris in After Effects: twinkling star fields, a day/night globe transition, aurora light effects, a layered mountain of Hermon build sequence with shake and star-echo effects, long-exposure sky rotation, Mediterranean sea water reflections, and an animated Polaris logo reveal.
- Designed all company marketing materials including internship announcements, Independence Day and Eid Al-Adha graphics, Workers' Day posts, and event posters, maintaining a consistent brand identity across Photoshop, and Illustrator
- Created and published all social media content across Obsidian Labs' official channels.
- Edited and produced video content in Premiere Pro for company use.

Flutter Developer → Team Leader, Polaris Mobile [\[GitHub\]](#)

Jan 2026 – Apr 2026

Obsidian Labs · Flutter · Dart · Cubit · Dio · GetIt · Git

- Defined the UI design philosophy and visual style language for Polaris Mobile, establishing design system principles that were adopted across all platform versions including desktop.
- Contributed to core module development within Clean Architecture and BLoC/Cubit from day one, then led architectural decisions after promotion to Team Leader.
- Managed the networking layer (Dio) with global error handling and interceptors connecting Flutter to a Python backend.
- Sole developer responsible for the iOS build, handling all platform-specific code and Xcode configuration.
- Conducted code reviews, approved merge requests, and managed source control across Codeberg and OneDev.

PROJECTS

Ajeer Mobile - Home Services Booking Platform

Sep 2025 – Dec 2025

Graduation Project · UI/UX Design · Flutter · Figma · .NET Core · Stripe

- Took the product from blank page to finished screens, started with paper sketches and hand-drawn user flows, then designed all 16+ screens in Figma and built the Flutter implementation solo.
- Post-submission, fully reimaged the core booking experience, expanding the user flow with new screens, refining interactions, and applying advanced Figma techniques including Smart Animate, hover/click states, responsive Auto Layout, and interactive components.
- Built full Arabic/English localization, dark/light theming, .NET Core REST API integration, and Stripe subscription payments.
- Delivered both iOS and Android builds; managed source control via GitHub, Codeberg, and OneDev.

Figma Prototyping Showcase - Interactive Component Suite

2025 – 2026

Personal Project · Figma · Smart Animate · Auto Layout · Variables

- Built a set of fully interactive Figma components to push the limits of what's possible natively in Figma and preserve them as reusable references: animated dropdown with hover/click states, scrollable list with a custom

drag slider using Smart Animate and On Drag triggers, macOS-style dock magnification (While Hovering + Smart Animate), toggle button with ON/OFF animation, arc-based loading spinner with a 4-variant rotation loop, animated notification stack with scale and opacity transitions, and an animated bottom drawer with a nested button component.

- Applied responsive Auto Layout patterns (Fixed, Fill, Hug) and Figma Variables for reusable design tokens across fill, stroke, dimensions, padding, and gap. Documented and shared on LinkedIn and portfolio as a showcase of advanced Figma prototyping.

Personal Portfolio

2025 – Present

huthaifa2.github.io · UI/UX Design · Motion Graphics · Figma

- Designed and built a portfolio covering UI/UX case studies and motion graphics work, with a clean, minimal aesthetic.

EDUCATION

B.Sc. Software Engineering

Mar 2022 – May 2026

The Hashemite University · Zarqa, Jordan

COURSES & CERTIFICATIONS

- Figma UI UX Design Essentials, Udemy (Daniel Walter Scott)
- Adobe After Effects CC Bootcamp: Beginner to Advanced, Udemy (Louay Zambarakji, KaiVersity)
- Adobe Illustrator CC: Essentials Training Course, Udemy (Phil Ebiner, Daniel Walter Scott)
- Flutter & Dart, The Complete Guide [2025 Edition], Udemy (Maximilian Schwärzmüller, Academind)
- Flutter UI Coding Course for Designers and Beginners, Udemy (M. Hendra)
