PROFILE

UI/UX and graphic designer with a strong focus on Figma prototyping, component systems, and visual design. Defined the visual language for an enterprise ERP platform adopted across all product versions. Led UI/UX on a home services booking app from early user flows through a full post-submission redesign. Built a complete macOS desktop prototype in Figma matching Apple's native design standards, alongside an advanced interactive component library. Proficient in the full Adobe suite including After Effects, Photoshop, Illustrator, and Premiere Pro, applied across motion graphics, brand identity, and marketing work at Obsidian Labs.

SKILLS

UI/UX: Figma (Auto Layout, Components, Prototyping, Smart Animate, Variables), Wireframing, User Flows, Design Systems, Responsive Design, Micro-interactions, Motion Prototyping

Graphic & Motion: Adobe After Effects, Photoshop, Illustrator, Premiere Pro, Motion Graphics, Brand Identity, Marketing Collateral, Video Editing

Development: Flutter, Dart, BLoC/Cubit, Clean Architecture, Dio, REST API, GetIt

Platforms: Git, GitHub, Codeberg, OneDev, Android Studio, Xcode, VS Code

PROJECTS

Ajeer Mobile - Home Services Booking Platform

Sep 2025 - Dec 2025

Graduation Project · UI/UX Design · Figma · Flutter · .NET Core · Stripe

- Designed 16+ screens in Figma starting from user flows and sketches, then built the full Flutter implementation solo.
- Post-submission, redesigned the core booking experience with new screens, refined interactions, and advanced Figma techniques including Smart Animate, hover/click states, and interactive components.
- Built Arabic/English localization, dark/light theming, .NET Core REST API integration, and Stripe subscription payments.
- Solely responsible for the iOS build, working across Xcode and VS Code; managed source control via GitHub.

Figma Advanced Prototyping & Systems Work

2025 - 2026

Personal Projects · Figma · Smart Animate · Auto Layout · Variables · Component Variants · Layer Blurring

- Reconstructed the full macOS desktop environment in Figma, covering Dock, Menu Bar, Spotlight, Control Center, Notification Center, and System Settings, matched to Apple's native spacing, corner radii, and component behavior. Light/Dark theme support with translucent overlays and layer blurring throughout.
- Built an extensive library of advanced interactive Figma components: buttons, toggles, search bars, tab switchers, dropdowns, animated dropdowns, drag sliders using On Drag + Smart Animate, macOS-style Dock magnification, arc loading spinners, progress bars, stacked cards, notification stacks, a notification bell icon, a glowing card border effect, collapsing and expanding sections, an animated snackbar, skeleton loading screens, and a nested bottom drawer.
- Implemented Light/Dark theme switching using Tokens Studio, with design tokens managing color, typography, spacing, and component states across the entire system. All components built with Auto Layout, variants, and instances for a fully scalable and reusable library.

Personal Portfolio

2025 - Present

huthaifa2.github.io · UI/UX Design · Motion Graphics · Figma

- Ongoing personal portfolio covering UI/UX case studies, Figma prototyping work, and motion graphics. Regularly updated as new projects are completed.

EXPERIENCE

Graphic & Motion Designer

Apr 2026 - Jun 2026

Obsidian Labs · After Effects · Photoshop · Illustrator · Premiere Pro

- Produced a motion graphics campaign for Polaris in After Effects: twinkling star fields, a day/night globe transition, aurora light effects, a Mountain of Hermon build sequence with shake and star-echo effects, long-exposure sky rotation, sea water reflections, and an animated logo reveal.
- Designed marketing materials including internship announcements, Independence Day and Eid Al-Adha graphics, Workers' Day posts, and event posters across Photoshop and Illustrator.

- Managed all social media content across Obsidian Labs' channels and edited video content in Premiere Pro.

Flutter Developer & Team Leader, Polaris Mobile (ERP)

Jan 2026 - Apr 2026

Obsidian Labs · Figma · Flutter · Dart · Cubit · Dio · GetIt · Git

- Defined the UI design philosophy and visual style language for Polaris Mobile, with design system principles adopted across all platform versions including desktop.
- Contributed to core module development in Clean Architecture and BLoC/Cubit, then led architectural decisions after promotion to Team Leader.
- Managed the networking layer (Dio) with error handling and interceptors connecting Flutter to a Python backend.
- Sole developer for the iOS build, handling platform-specific code and Xcode configuration.
- Conducted code reviews, approved merge requests, and managed source control across Codeberg and OneDev.

EDUCATION

B.Sc. Software Engineering

Mar 2022 - May 2026

The Hashemite University · Zarqa, Jordan

COURSES & CERTIFICATIONS

- Figma UI UX Design Essentials, Udemy (Daniel Walter Scott)
- Adobe After Effects CC Bootcamp: Beginner to Advanced, Udemy (Louay Zambarakji, KaiVersity)
- Adobe Illustrator CC: Essentials Training Course, Udemy (Phil Ebner, Daniel Walter Scott)
- Flutter & Dart, The Complete Guide [2025 Edition], Udemy (Maximilian Schwärzmüller, Academind)
- Flutter UI Coding Course for Designers and Beginners, Udemy (M. Hendra)
