PROFILE

Designer and developer who works across the full product stack from research and wireframes through high-fidelity Figma prototypes to pixel-accurate Flutter implementation. Defined the visual language and UI design philosophy for an enterprise ERP platform. Designed complete booking experiences end-to-end in Figma, including new screens and refined interaction flows. Produced a full motion graphics campaign in After Effects and designed all brand materials across print and digital. Strong prototyping skills in Figma including hover/click states, animated dropdowns, scrollable list widgets, toggle buttons, loading animations, and a macOS-style dock magnification effect. Also built an Apple-inspired personal portfolio with a modern minimal aesthetic.

SKILLS

UI/UX: Figma (Auto Layout, Components, Prototyping, Smart Animate, Variables), Wireframing, User Flows, Responsive Design, Design Systems, Micro-interactions, Motion Prototyping.

Graphic & Motion: Adobe After Effects, Adobe Photoshop, Adobe Illustrator, Adobe Premiere Pro, Motion Graphics, Brand Identity, Marketing Collateral, Social Media Content, Video Editing.

Development: Flutter, Dart, BLoC/Cubit, Clean Architecture, Dio, REST API, GetIt.

Platforms & Tools: Git, GitHub, Codeberg, OneDev, Android Studio, Xcode, VS Code.

EXPERIENCE

Obsidian Labs | Graphic & Motion Designer

Apr 2026 – May 2026

Brand, Marketing & Motion Graphics · After Effects · Photoshop · Illustrator · Premiere Pro · Figma

- Produced a full motion graphics campaign for Polaris in After Effects: twinkling star fields, day/night globe transition, aurora light effects, a full mountain of Hermon build sequence with shake and star-echo effects (long-exposure sky rotation), Mediterranean sea water reflections, and an animated Polaris logo reveal.
- Designed all company marketing materials, internship announcement posts, Independence Day and Eid Al-Adha graphics, Workers' Day posts, and event posters; maintaining a consistent brand identity across Photoshop, Illustrator, and Figma.
- Created and published all social media content across official Obsidian Labs channels.
- Edited and produced video content in Premiere Pro for company use.

Obsidian Labs | Flutter Developer → Team Leader - Polaris Mobile

Jan 2026 – May 2026

Flutter · Dart · Cubit · Dio · GetIt · Git · Python Backend

- Defined the UI design philosophy and visual style language for Polaris Mobile, establishing the design system principles subsequently adopted across all Polaris platform versions including desktop.
- Contributed to core module development within Clean Architecture and BLoC/Cubit from day one, and led architectural decisions after promotion to Team Leader.
- Managed the networking layer (Dio) with global error handling and interceptors connecting Flutter to a Python backend.
- Sole owner of the iOS platform - Xcode build settings, signing, and platform-specific release configuration.
- Conducted code reviews, approved merge requests, and collaborated via Git across Codeberg and OneDev.

PROJECTS

Ajeer Mobile - Home Services Booking Platform | Graduation Project

Sep 2025 – Dec 2025

UI/UX Design · Flutter · Figma · .NET Core · Stripe

- Sole UI/UX designer: designed all screens and complete user flows in Figma, then delivered a pixel-accurate Flutter implementation with custom animations and smooth transitions.
- Re-imagined and redesigned the core booking experience post-launch - expanded the user flow with new screens, refined interactions, updated visual language, and applied advanced Figma prototyping techniques including Smart Animate, hover/click states, responsive Auto Layout, and interactive components.
- Built full Arabic/English localization, dark/light theming, .NET Core REST API integration, and Stripe subscription payments.
- Delivered both iOS (Xcode) and Android builds; managed source control via GitHub, Codeberg, and OneDev.

Advanced Figma Prototyping - Interactive Component Library

2025 – 2026

Figma · UI/UX · Prototyping · Smart Animate · Auto Layout

- Built a suite of fully interactive Figma components: animated dropdown widget with hover/click item states, scrollable list with custom drag slider using Smart Animate and On Drag triggers, macOS-style dock with magnification effect (While Hovering + Smart Animate), toggle button (OFF/ON with Smart Animate), arc-based loading spinner with 4-variant rotation loop, animated notification stack with scale and opacity transitions, and an animated bottom drawer with nested button component.
- Applied responsive Auto Layout patterns (Fixed, Fill, Hug) and Figma Variables for reusable design tokens across fill, stroke, dimensions, padding, and gap.

Apple-Inspired Personal Portfolio

2025 – Present

UI/UX Design · Figma · Web

- Designed and built a personal portfolio with a modern minimal aesthetic inspired by Apple's design language, showcasing UI/UX, motion graphics, and development work.

EDUCATION

The Hashemite University | B.Sc. Software Engineering

Mar 2022 – May 2026

Zarqa, Jordan

- All academic coursework completed. Available for immediate full-time start.

COURSES & CERTIFICATIONS

- Figma UI UX Design Essentials - Udemy (Daniel Walter Scott)
- Adobe After Effects CC Bootcamp: Beginner to Advanced - Udemy (Louay Zambarakji, KaiVersity)
- Adobe Illustrator CC: Essentials Training Course - Udemy (Phil Ebner, Daniel Walter Scott)
- Flutter & Dart - The Complete Guide [2025 Edition] - Udemy (Maximilian Schwärzmüller, Academind)
- Flutter UI Coding Course for Designers and Beginners - Udemy (M. Hendra)
